

How to Check Your Domain's Disk Space Usage

1) Browse to <http://control.yourdomainnamehere.co.za> e.g.:

2) Click on "Control Panel":

Copyright konsoleH 2012 | All Rights Reserved

3) Enter your username e.g. 'tristar.co.za' and password, and click on "Login":

KONSOLE H

Domain (eg. domain.com)

Password

Login Guidelines:

Domain Level
Enter domain name and FTP password to access a single domain control panel.

Note: JavaScript and Cookies must be enabled.
1.9.1

4) Click on "Statistics & Reports":

tristar.co.za

-  Domain Details
-  Manage Services
-  **Statistics & Reports**

Reports

- Disk Usage
- Traffic Usage
- Error Logs

Statistics

- AWStats

 Software

 Mail

5) Click on “Disk Usage” and then click “View the Long-listing”:

[[View the long-listing](#)]

The long-listing displays a folder-by-folder breakdown of the selected domain down to 10 sub-levels.

Depending on the number of items stored in the folders, it may take a few minutes for the long-listing to return with details.

Reminder: Make use of the Disk Cleanup tool to configure rules for removing mail in the trash and spam folders as well as deleting web log files for your domain.

Here you can view your disk space quota and the amount of disk space used. The drop-down of the long-listing will provide details of what is using disk space on your domain.
